

DELIVERING EXCELLENCE IN INDUSTRIAL DEVELOPMENT – A NEW BENCHMARK PROJECT IN TIMISOARA

Vitalis Consulting is proud to be involved in an ambitious industrial development currently taking shape in Timisoara, Western Romania. This project represents a new benchmark in efficiency, sustainability, and modern industrial design. The facility covers approximately 10,000 sqm and includes dedicated production and storage zones designed to meet the exacting technical requirements of a major electronics sector client. As a state-of-the-art industrial production facility, it is built with the goal of achieving the highest level of green certification, reflecting a strong commitment to environmental responsibility. A key feature of this development is the integration of specialized rooms constructed to high cleanliness standards, tailored for the production of sensitive electronic components. These spaces ensure strict environmental control to maintain product quality and process reliability, setting this project apart as a regional reference for similar industrial facilities.

Vitalis Consulting provides a full suite of professional services throughout the entire project lifecycle, including Project & Cost Management, Site Management, Site Inspection, and Health & Safety Coordination. Our on-site team works closely with the client and stakeholders to guarantee that the project progresses smoothly, stays within budget, and meets rigorous quality and safety standards. Through this project, Vitalis continues to support the advancement of Romania's industrial sector and contributes to the development of next-generation infrastructure in Timisoara, one of the country's most dynamic economic hubs.
