

SETTING NEW STANDARDS: VITALIS CONSULTING LEADS HIGH-BAY COLD STORAGE DEVELOPMENT IN CAMPIA TURZII

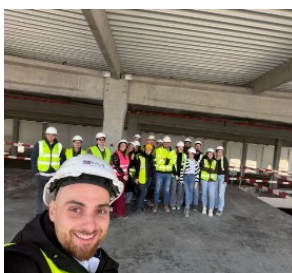

Vitalis continues to strengthen its position as a market leader in project management by actively supporting the development of a new high-bay cold storage warehouse in Câmpia Turzii. This advanced logistics facility, with an approximate footprint of 4,300 square meters and a maximum height of 44.6 meters, is designed to operate at -24°C and provides storage capacity for 26,500 pallets. The fully automated warehouse, equipped with seven-lane stacker cranes, marks a significant step forward in Romania's cold chain infrastructure.

Throughout the project, Vitalis Consulting is providing comprehensive services including Project & Cost Management, Site Management, Site Inspection, and Health & Safety Coordination. Our rigorous approach ensures strict adherence to timelines, budget control, and compliance with the highest quality and safety standards. This project highlights Vitalis Consulting's deep expertise in managing complex industrial developments and underscores our commitment to delivering tailored, efficient solutions that meet the evolving needs of our clients and the market.

With a proven track record and extensive know-how, Vitalis Consulting remains the preferred partner for high-profile logistics and industrial projects across Romania.

KEEP IN TOUCH WITH US!

Yesterday, we had the pleasure of welcoming a group of students from the Politehnica University of Timișoara to one of our large industrial projects currently under development.
