

## H EAST RESIDENCE PHASE I: A LANDMARK DEVELOPMENT IN THE MAKING

Image courtesy of Hagag Development Europe

Developed by Hagag Development Europe, Phase I of H East Residence is swiftly taking shape in East Bucharest, emerging as a notable presence within the area’s evolving residential landscape.

Designed following the “Gated Community” concept, H East Residence will introduce to the market, once completed, a total number of 568 apartments, 824 parking spaces, and a generous retail area, responding to a growing demand for well-designed urban living environments. The project reflects a careful approach to both functionality and the area’s needs and requirements, promoting comfort, accessibility, privacy and better living. Beyond its scale, the development highlights Hagag’s continued commitment to delivering quality residential products, at all price points.

The collaboration between Vitalis Consulting PM and Hagag Development Europe began in 2019, laying the foundation for a solid and trusted partnership. Since then, the relationship has been defined by professionalism, efficiency, and a shared commitment to excellence. H East Residence stands as a continuation of this collaboration, reflecting both experience and aligned objectives. As the project progresses, it plays an important role in shaping the surrounding urban environment and raising the standard for future developments. H East Residence is not only a residential project, but also a reflection of vision, partnership, and consistent delivery in a dynamic real estate market.
